

THE NEW MINI JOHN COOPER WORKS.

# » A THIRST FOR POWER. A LOVE OF CURVES.

As the next curve approaches, a smile of anticipation creeps across your face. The 231-hp/170-kW Twin Power Turbo engine powers your new MINI John Cooper Works through the tunnel, its satisfying, low-frequency sound echoing off the walls. With up to 320Nm of torque, it sends the adrenaline coursing through your veins. In Sport mode, the chassis becomes more rigid, the steering more direct. The engine responds in the tiniest fraction of a second. With a top speed of 246 km/h, you'll find it hard to wipe the grin off your face. Never mind. You can always give your cheek muscles a rest when you reach your destination.

» PUT YOURSELF  
IN POLE POSITION.

In one of many retro touches, the MINI John Cooper Works gear lever knob looks like something out of a classic sports car. But the equally stylish 6-speed manual transmission couldn't be more state of the art. The shift gaiter and leather sports steering wheel (incl. multifunction option) are stitched in contrasting Chili Red. Dynamical/leather sport seats in Carbon Black, with built-in headrests, add to the racing feel and provide full support in every situation.

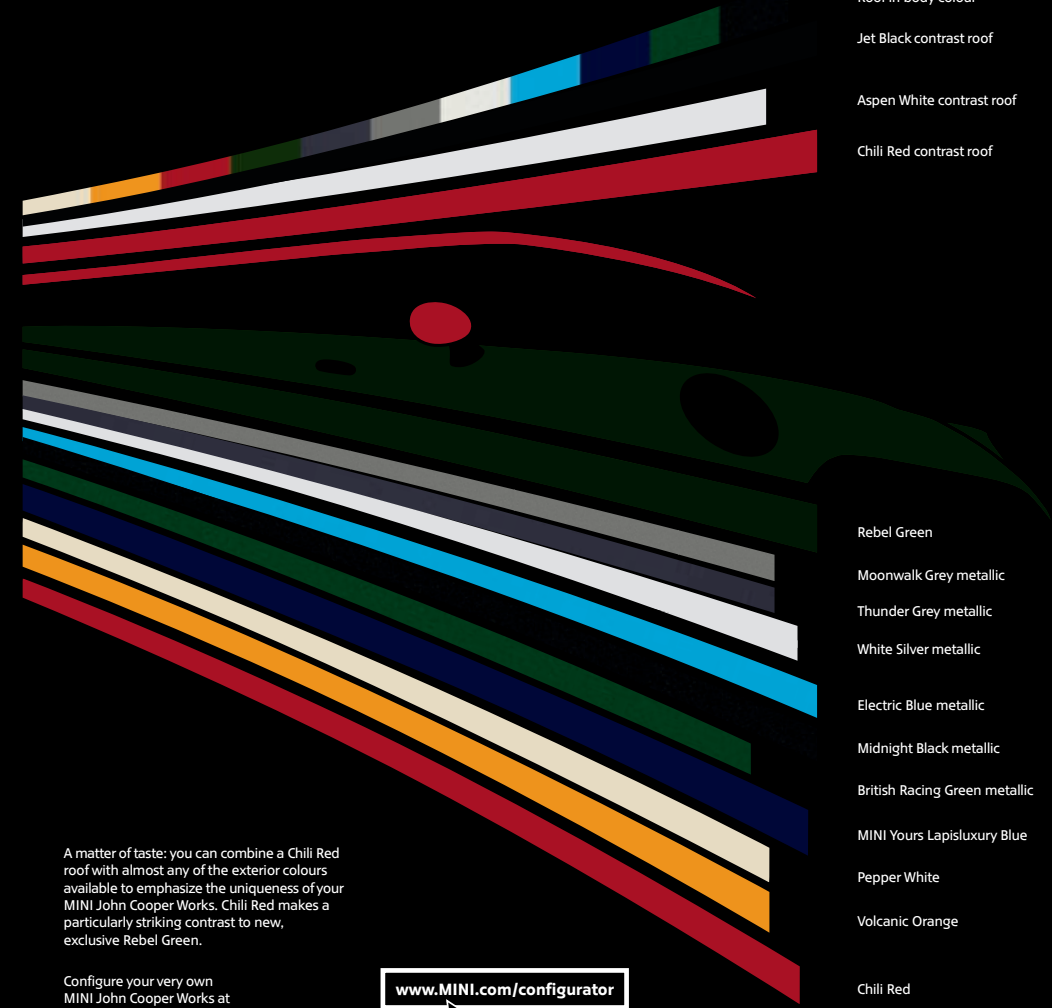

The MINI Head-Up Display is an ever-present reminder that even when you're pushing this car to the limit, it's still fun to drive. The display shows not only your speed and revs, but the optimum gear-change point.

A touch of elegance: the John Cooper Works logo on the eye-catching door sill finishers.

A matter of taste: you can combine a Chili Red roof with almost any of the exterior colours available to emphasize the uniqueness of your MINI John Cooper Works. Chili Red makes a particularly striking contrast to new, exclusive Rebel Green.

The John Cooper Works logo on the side scuttles tells you two things about the car. It's exclusive, and it's a whole lot of fun to drive.

The central twin-pipe sports exhaust will delight your eyes and ears.

The four-piston, fixed-caliper brakes deliver hugely impressive stopping power.

The John Cooper Works aerodynamic kit features large apertures in the front apron to optimize brake and engine cooling, prominent side skirts in the same colour as the car, a rear spoiler, and an eye-catching diffuser on the rear apron. Because you can't have power without aerodynamics.

## WHEELS.

The wheels are the finishing touch to the head-turning looks and distinctive go-kart feel you'd expect from a John Cooper Works.

<sup>1</sup> The MINI John Cooper Works complies with the EU6 exhaust emissions standard. Fuel consumption is determined in accordance with the ECE driving cycle (as defined in directive 80/1268/EEC), made up of approximately one third urban and two thirds extra-urban driving (based on the distance covered). CO<sub>2</sub> emissions are measured separately from fuel consumption. Figures relate to standard-specification vehicles, and may vary significantly where optional equipment (including wider tyres) is fitted.

<sup>2</sup> All figures relate to vehicles with the standard 6-speed manual transmission. Figures in brackets relate to vehicles with 6-speed Steptronic Sport transmission.

<sup>3</sup> Assuming car is fuelled to 90% of usable tank capacity, and allowing 68 kilograms for the driver and 7 kilograms for luggage. Figure quoted is for standard-specification vehicles. Optional equipment will increase this figure.

\* 6-speed manual transmission expected to be available from June 2015.
